

ATTENTION HOME

Protect Your Meds!

FACT

Prescription drugs ARE stolen from homes for sale, sometimes during showing appointments, sometimes at open houses.

HOW THEY DO IT

Typically a team (perhaps as a couple, a family, or friends) poses as prospective buyers. As one person keeps the REALTOR® busy with questions, others look for easily accessible prescription drugs to steal.

WHAT YOU CAN DO

Here are three easy steps you can take to prevent drug theft while your house is for sale.

- Secure medications in the same way that you would a wallet, checkbook, and credit cards
- Place prescription drugs in a locked container and hide them in a location that would take a significant amount of time to find.
- Remove all controlled substance prescriptions such as pain medications, anti-anxiety drugs, and all medications used for ADD and/or ADHD.
